

SPEAK with AI

A framework to support students to engage critically and creatively with AI

S SET PURPOSE

- What is my purpose for using AI in this task?
- What do I already know?
- Do I want AI to do some work for me that I refine and adapt (centaur) or work with me while I think through and complete the task in collaboration with the AI (cyborg)?
- How could AI make my ideas better or clearer?

P PROMPT

- Ask clear and detailed questions.
- Give it enough details so it understands your task.
- Keep improving your questions and instructions to AI until you get the answers you need.

E EVALUATE

- Check if AI's answers are true, fair, and useful.
- Look for bias or missing information.
- Double check AI information with trusted sources.

A APPLY

- Take the best ideas from AI and add your own thinking.
- Use AI feedback to improve your work.
- Think about what else you could ask or learn to understand the topic more deeply.

K KUDOS

- Say how AI helped you and what you did yourself.
- Be proud of the teamwork between you and AI.
- Think about how it changed your ideas, and give AI credit properly when you hand in your work by referencing your AI usage.
